Raditeq B.V. is cooperating with suppliers in developing methods to track the origin of metals used in electronics products, and we are using our reasonable best efforts to ensure that we do not (in)directly support violence- and human rights abuses in the DRC region.

Like many other companies though, Raditeq B.V. faces challenges to gather complete and comprehensive information from its worldwide direct and indirect supply chain.

As Raditeq B.V. does not source directly from smelters or mines, we are working closely with our own suppliers to understand the sources of the metals contained in their products, to assure conflict free metals in our supply chain. Our Purchasing Terms and Conditions reinforce this policy with our suppliers. We require our suppliers, who use tantalum, tin, tungsten, and gold in their products, to submit their sourcing information, using the RMI Conflict Minerals Reporting Template (CMRT) as a standard.

Raditeq B.V. continues its efforts to improve its knowledge of the origin of the 3TG present in its large range of products throughout its supply chain.

For any questions or feedback on Conflict minerals, please send to an email to: sales@raditeq.com
