

General Availability (GA)

A major version is released as General Availability (GA) for all customers. The GA milestone signifies when a product can be bought.

End of Life Announcement (EOLA)

This is the date that a specific major product version will no longer be available for purchase. This is generally the date at which the replacement product will become available.

End of Maintenance (EOM)

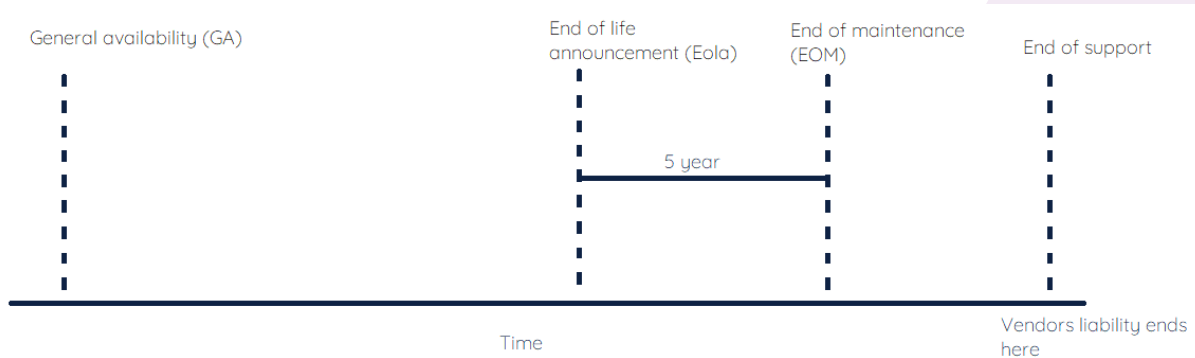

The End of Maintenance milestone marks the start of the product version retirement period. From this milestone, the product (firmware) version is no longer maintained by our support department. Functionality will be “as is”. Raditeq generally uses the rule that the EOL date is based on 5 years after EOLA.

End of Support (EOS)

The End of Support milestone marks the date after which technical support for that product version will no longer be available, no repair service can (will) be performed anymore. These products are not supported in the latest software- and hardware versions of the RadiCentre platform. Raditeq strives to deliver technical support after the EOM but if components are no longer commercially available the EOS may and can begin before the EOM.

End of Life tables

The picture below shows how 'end of life' milestones for consecutive versions are interconnected to each other on a time scale.

Raditeq B.V.: Radi-products

Version	GA	EOLA	EOM	EOS
CTR1001A		Aug 2009	Aug 2014	✓
CTR1001B		Mei 2009	Mei 2014	✓

Recycling

This product® contains materials that can be recycled and reused to minimize material waste. At the 'end-of-life', specialized companies can dismantle the discarded system to collect the reusable and recyclable materials. If your product is at its 'end-of-life', please return it to your local reseller or to Raditeq for recycling.
